What is SEP?

SEP (Suzuki Eco Performance) is a new developmental concept proposed by Suzuki. At Suzuki, we pay great attention to riding performance, and "SEP" stands for our next-generation engine that offers both low fuel consumption and superior acceleration. Suzuki sets higher standards for environmental performance in both fuel consumption and emission... but we never compromise riding performance.

Make your daily life on the bike more eco, yet more performance!
SEP (Suzuki Eco Performance) brings you the excellent balance of fuel economy and riding performance you've been waiting for.
